

Criteria for Award of Postgraduate Degrees in Public Administration

Article 1 The Requirements for the Study and Training Process of Postgraduate Degrees in Public Administration is formulated upon discussion and decision by the PA&H degree subcommittee according to the Implementing Regulations of USTC for Award of Master's and Doctoral Degrees (Xiaoxueweizi [2009] No. 173) and the spirit of the relevant instructions of USTC on the training of postgraduates (the criteria is also applicable to postgraduate degrees in law).

Article 2 Requirements for the Study and Training Process of Doctoral Candidates in Public Administration

2.1 Course requirements in the field of specialization: A candidate shall complete the course requirements stipulated in the training program before applying for graduation and degree.

2.2 International academic exchange: During the doctoral program, a candidate shall attend at least one international academic conference, make at least one short-term overseas study visit, or participate in a joint training program. After the academic exchange, the candidate shall submit an academic summary report and the related materials pertaining to the conference of study visit (poster presentation or conference materials, among others) to the Supervisor. The summary report shall be used as one of the documents for graduation and degree application.

2.3 Research progress report: A candidate shall submit annual research progress reports during the doctoral program, and the reports shall be approved by the Supervisor and reviewed by the doctoral program unit for assessment. The candidate who failed in the assessment may be transferred to the master's program with the consent of the program unit and the School. The program unit can organize the doctoral qualifying examination, and set the specific requirements.

2.4 Dissertation prospectus: A candidate shall make a case for the dissertation topic and research approach as well as prepare a dissertation prospectus prior to carrying

out research on the dissertation. The dissertation prospectus shall be scheduled by the Supervisor according to the research progress of the doctoral candidate, and shall generally be completed by the third semester upon qualifying as a doctoral candidate or the fourth semester, at the latest. The dissertation prospectus shall be used as one of the documents for graduation and degree application.

Article 3 Requirements for Scientific Research Achievements of Doctoral Candidates in Public Administration

3.1 Prior to applying for a doctoral degree, an integrated master's-doctoral program 'candidate, as the first author (except for the Supervisor's signature) and USTC as the first signed institution, shall have at least three academic papers related to the dissertation published or accepted by domestic core journals (those marked “*” in the attached catalog of journals) recognized by the PA&H degree subcommittee or the journals of “Double First-class” construction universities; or at least two research academic papers related to the dissertation published in a high-level English language journal in the discipline or at least one research academic paper related to the dissertation published in a high-level English language journal of Grade A and above.

3.2 Prior to applying for a doctoral degree, a general doctoral candidate, as the first author (except for the Supervisor's signature) and USTC as the first signed institution, shall have at least two academic papers related to the dissertation published or accepted by domestic core journals (those marked “*” in the attached list of journals) recognized by the PA&H degree subcommittee or the journals of “Double First-class” construction universities, or at least one research academic paper related to the dissertation published in a high-level English language journal of Grade A and above.

3.3 Any of the following scientific research achievements obtained in during doctoral program is equivalent to one paper published in a domestic core journal:

1. An academic paper published or accepted by a peer-reviewed international English language journal sponsored by any of the following publishing institutions.

Recognized International Publishers

INFORMS	Springer (Including Kluwer)	John Wiley / Blackwell	Elsevier	Taylor & Francis
SAGE	McGraw-Hill	Emerald	Palgrave Macmillan	World Scientific
The presses of Harvard, Oxford, Cambridge, MIT and other top universities in the world				

2. Won a state-level scientific research achievement award (ranked among the top five) or a provincial or ministerial-level scientific research achievement award (ranked among the top three).
 3. Published an academic monograph (among the first three authors and independently contributed a total of more than 50,000 words).
 4. Obtained an invention patent related to the dissertation granted as the first inventor (except for the Supervisor's signature) with the patent certificate issued.
 5. Published a provincial or ministerial-level or above special report for internal reference as the first author (except for the Supervisor's signature).
 6. Has an academic paper reprinted in NPC Reprographics Journal (series) or Xinhua Digest.
- 3.4 Papers published by a doctoral candidate in journal supplements are generally not recognized.

Article 4 Requirements for the Study and Training Process of Master's Degree Candidates in Public Administration

- 4.1 Course requirements in the field of specialization: A candidate shall complete the course requirements stipulated in the training program before applying for graduation and degree.
- 4.2 The dissertation prospectus for the master's thesis shall be evaluated and scheduled by the Supervisor according to the research progress of the candidate, and shall generally be completed by the fourth semester of the master's program. The dissertation prospectus shall be organized by the School, and evaluated by a review committee consisting of at least three peer experts of the discipline and related disciplines with a senior professional title, and is approved only if at least two-thirds

of the review experts vote in favor. A candidate whose dissertation prospectus failed may apply to repeat the dissertation prospectus after two months.

4.3 The mid-term examination shall be conducted to evaluate the thesis generally one semester after the dissertation prospectus is approved. The department shall assemble an expert committee for mid-term examination. The formation of the review committee and the approval measures shall be similar to that for the dissertation prospectus. The candidate who fails the mid-term examination may apply to resit the mid-term examination within two months, and if having failed again, may not apply for the thesis defense.

4.4 A candidate shall attend the academic lectures organized by the program unit during the program. A candidate is encouraged to participate in the academic conferences at home and abroad with the relevant academic achievements during the program.

4.5 The quality and preparation requirements for the thesis shall be governed by the USTC Manual for Thesis Preparation.

4.6 The requirements for thesis review and defense shall be governed by the Implementing Regulations of USTC for Award of Master's and Doctoral Degrees.

Article 5 Requirements for Scientific Research Achievements of Master's Candidates Applying for a Degree in Public Administration

5.1 Prior to applying for a master's degree, a master's candidate, as the first author (except for the Supervisor's signature) and USTC as the first signed institution, shall have at least one academic paper related to the thesis published or accepted by a domestic core journal (as shown in the attached catalog of journals) recognized by the School's degree subcommittee.

5.2 Any of the following academic achievements obtained during the master's program is equivalent to one paper published in a domestic core journal:

1. One academic paper published or accepted by the journal of a "Double First-class" construction university.

2. An academic paper published or accepted by a peer-reviewed international English language journal sponsored by any of the following publishing institutions.
3. Won a state-level scientific research achievement award (ranked among the top ten) or a provincial or ministerial-level scientific research achievement award (ranked among the top five).
4. Published an academic monograph (among the first three authors and independently contributed a total of more than 30,000 words).
5. Obtained an invention patent related to the dissertation granted as the first inventor (except for the Supervisor's signature) with the patent certificate issued.
6. Published a provincial or ministerial-level or above special report for internal reference as the first author (except for the Supervisor's signature).

5.3 One case study published by a master's candidate in the case libraries recognized by the Ministry of Education, such as China Case Center for Public Policy & Management at Tsinghua University, China Management Case Sharing Center and Peking University Case Research Center, is equivalent to one paper published in a major domestic core journal.

5.4 Papers published by a master's candidate in journal supplements are generally not recognized.

Article 6 The School's degree subcommittee shall discuss and decide on the academic papers published in domestic journals not included in those recognized by the subcommittee as well as other scientific research achievements related to the thesis or dissertation obtained by master's or doctoral degree candidates.

Article 7 The aforesaid regulations shall be implemented from June 2020.

Article 8 Requirements for the study and training process of international students: The criteria shall be applicable to international students enrolled before 2019 from January 2022 at the latest, and applicable to all international students enrolled in and after 2019 from June 2020.

Criteria for Award of Postgraduate Degrees in Philosophy

I. Requirements for the Study and Training Process of Postgraduates in Philosophy of Science and Technology

Article 1 The Requirements for the Study and Training of Postgraduates in Philosophy of Science and Technology is formulated after discussion and decision by the PA&H degree subcommittee according to the Implementing Regulations of USTC for Award of Master's and Doctoral Degrees and the spirit of relevant instructions of USTC on the training of postgraduates.

Article 2 Requirements for the Study and Training Process of Postgraduates in Philosophy of Science and Technology

2.1 Master's Degree Candidate Admission Qualifications

The admission qualifications of a master's candidate shall be governed by the relevant regulations of the state and USTC.

2.2 Doctoral Candidate Admission Qualifications

Eligibility criteria for application to the doctoral program in philosophy of science and technology: The applicant shall have published an academic paper related to the philosophy of science and technology in a journal of Grade 2 or above. The program unit shall organize a written test and an interview according to USTC regulations. The assessment committee, comprising at least three experts, shall grade the applicants, with the written test and interview each accounting for 50%. The applicants recommended for enrollment shall be ranked according to their scores from the top to the bottom and reported to the Graduate School of USTC.

2.3 Requirement for Courses and Credits

A postgraduate shall meet the requirements for courses and credits during the program according to the USTC Training Program for Postgraduates in Philosophy of Science and Technology.

2.4 Requirements for Academic Exchange

A postgraduate is encouraged to actively participate in international academic conferences or overseas academic exchanges with his or her relevant academic achievements during the program. The program unit will provide the necessary assistance and actively support the application for financial aid. After completing the international academic exchange, the postgraduate shall promptly submit the relevant supporting documents to the faculty's Registrar, and make a report of the exchange to the program unit.

During the program, a doctoral candidate shall attend at least two relevant domestic academic conferences, and a master's candidate, at least one. During the program, a doctoral candidate shall deliver at least two academic lectures at the academic forums conducted regularly by the program unit, and a master's candidate, at least one.

A postgraduate shall attend at least 70% of the academic lectures organized by the program unit.

2.5 Teaching Experience

A postgraduate is encouraged to serve as a teaching assistant in undergraduate and graduate courses or participate in relevant teaching research projects.

2.6 Annual Assessment

A master's candidate shall promptly report his or her research progress to the Supervisor.

A doctoral candidate shall submit annual research progress reports during the doctoral program, and the reports shall be approved by the Supervisor and reviewed by the program unit for assessment. The expert committee may advise the doctoral candidate who fails in the assessment to transfer to the master's program, change major or withdraw from the program according to the specific conditions.

2.7 Evaluation of dissertation prospectus

The prospectus for the master's thesis shall be completed by the third semester of the program and evaluated by a committee consisting of three experts including at least two associate professors. The prospectus for the doctoral dissertation shall be completed by the third semester upon qualifying as a doctoral candidate, and no later

than one year before the dissertation defense. The review committee shall consist of five experts including at least four professors. The postgraduate who fails to complete the dissertation prospectus on time shall have his program duration extended according to the relevant regulations of USTC. A dissertation prospectus that failed the expert review shall be repeated at a later time. If the research topic undergoes significant change after the dissertation prospectus has been approved, a new dissertation prospectus shall be prepared.

2.8 Review of Thesis or Dissertation

The review of master's theses shall be governed by the relevant regulations of USTC.

Doctoral dissertations shall be subject to double-blind review. A dissertation shall be reviewed and approved by the Supervisor prior to submission for double-blind review organized by the USTC Degree Office with the assistance by the program unit.

2.9 Thesis or Dissertation Defense

Thesis or dissertation defense shall be governed by the Implementing Regulations of USTC for Award of Master's and Doctoral Degrees. An excellent thesis or dissertation can be recommended by the defense committee as an excellent thesis or dissertation after the defense.

If a postgraduate fails to meet the requirements for academic achievements on time, a comprehensive evaluation may be organized by the program unit upon application by the postgraduate and approval by the Supervisor, to decide whether the postgraduate is qualified for thesis or dissertation defense, but the degree shall not be awarded until the requirements for academic achievements are satisfied. If the postgraduate fails the comprehensive evaluation, the postgraduate shall withdraw from the program.

2.10 Public Announcement of Thesis or Dissertation

Please refer to the relevant regulations of USTC.

2.11 Random Review of Thesis or Dissertation

If a thesis or dissertation which has passed the defense is found to be unqualified in a random review by the relevant departments, the program unit shall set up an expert

committee to review the thesis or dissertation and decide whether to request the USTC Degree Committee revoke the awarded degree.

2.12 Supervisor's Responsibility

Please refer to the relevant regulations of USTC.

Article 3 Requirements for Academic Achievements

3.1 Prior to applying for a master's degree, a master's candidate, as the first author and USTC as the first signed institution, shall have published at least one academic paper in a journal of Grade II or above or two academic papers in Grade III journals .

3.2 Prior to applying for a doctoral degree, a doctoral candidate, as the first author USTC as the first signed institution, shall have published at least one academic paper in a Grade I journal, or two academic papers in journals of Grade II, or one academic paper in a Grade II journal and two academic papers in III journals.

Article 4 Recognition of Academic Journals, Achievements and First Author

4.1 The high-level journals, papers and works included in SCI, SSCI, EI, A&HCI, SCOPUS and other databases and identified by the expert committee are classified as Grade I; the journals and academic works (every 25,000 words in a published work is counted as an academic paper) included in CSCD, CSSCI, Peking University's A Guide to the Core Journals of China and other databases or recognized by the PA&H degree subcommittee are classified as Grade II; and the officially published journals, popular science works, academic translations or conference proceedings are classified as Grade III (every 30,000 words in a published work is counted as an academic paper).

4.2 The identification of other high-level publications, academic papers and works shall be approved upon collective review by an expert committee comprising at least five doctoral supervisors (including at least two external experts).

4.3 Except for the Supervisor's signature as the first author, a doctoral candidate shall be the first author of at least one academic paper rather than the co-first author.

4.4 The academic papers used for degree application shall be relevant to the graduation thesis or dissertation.

4.5 The official letter of acceptance from a journal may be submitted as an achievement, but the order of authors and institutions shall remain unchanged for publication. The official publication information shall be submitted for filing upon official publication. Any misconduct such as forging or altering the letter of acceptance shall be subject to serious disciplinary action, or the degree revoked.

Article 5 Implementation Date

The regulations shall be implemented from September 2020 and applicable to all international students enrolled in and after 2019, but shall be applicable to those enrolled before 2019 from January 2022.

II. Requirements for Study and Training Process of Postgraduates in Marxist Philosophy and Chinese Philosophy

Article 1 The Criteria for Award of Postgraduate Degrees in Marxist Philosophy and Chinese Philosophy is hereby formulated by the degree subcommittee in Public Administration and Humanities after discussion and research according to the Implementing Regulations of USTC for Award of Master's and Doctoral Degrees, the Guidance of USTC on Recognizing Innovative Achievements for Postgraduate Degree Application, and the spirit of the relevant instructions of USTC on the training of postgraduates.

Article 2 Requirements for Study and Training Process of Postgraduates

2.1 Admission Qualifications of Postgraduates

The admission qualifications of postgraduates should be governed by the relevant regulations of the state and USTC.

2.2 Requirements for Courses and Credits

In the program duration, a postgraduate must meet the requirements for courses and credits and also other compulsory requirements stipulated in the education program.

2.3 Requirements for Academic Exchange

A postgraduate should attend the academic lectures organized by the program station. A postgraduate is encouraged to participate in the academic conferences at home and abroad with relevant academic achievements in the program duration.

2.4 Evaluation of Dissertation Prospectus

The dissertation prospectus for master's thesis should be evaluated and scheduled by the Supervisor according to the research progress of the candidate, and completed in the fourth semester of the program duration in general. The evaluation of a dissertation prospectus should be organized by the School of Marxism, and conducted by a group consisting of at least five experts of the discipline and related disciplines. A dissertation prospectus should be acceptable only if being approved by a two-thirds majority of the evaluation experts. A candidate whose dissertation prospectus failed may apply for repeating the dissertation prospectus in the next semester.

2.5 Mid-term Examination

A mid-term examination should be conducted to evaluate a master's thesis within one semester after his/her successful dissertation prospectus. The School of Marxism should organize the mid-term examination and form an expert group for it the way the evaluation group for the dissertation prospectus is formed. The master's candidate who fails in the mid-term examination may apply for repeating the mid-term examination within two months, and is not allowed to apply for the thesis defense in case of failing again.

2.6 Review of Degree Thesis

The achievements presented in a master's thesis should be advanced and of good academic level in the discipline. The master's thesis should be prepared according to the USTC Manual for Thesis Preparation and reviewed according to the relevant unified regulations of USTC.

2.7 Thesis Defense

The requirements for thesis review and defense for a master's degree should be governed by the Implementing Regulations of USTC for Award of Master's and Doctoral Degrees.

2.8 Public Announcement of Thesis

Please refer to the relevant regulations of USTC.

2.9 Random Review of Thesis

If a thesis which has passed the defense is found to be unqualified in the random review by USTC, the awarded degree will be revoked by the USTC Degree Management Committee.

2.10 Supervisor's Responsibility

Please refer to the relevant regulations of USTC.

Article 3 Requirements for Academic Achievements for Degree Application

3.1 Before applying for a master's degree, a candidate must have at least one academic paper related to his/her thesis, published or accepted in a journal included in SSCI, A&HCI, CSSCI, CSCD (core library), Peking University's GCJC or other databases, or a domestic journal recognized by the degree subcommittee in Public Administration and Humanities, as the first author and with USTC as the signing institution.

3.2 An academic monograph related to the thesis published by a master's candidate (among the first three authors and with a total of more than 25,000 words independently contributed) is equivalent to one academic paper published in a journal listed in Clause 3.1.

3.3 An academic paper published by a master's candidate as the first author (the Supervisor is not counted) in the journal of a university approved with a graduate school, with USTC as the first signing institution is equivalent to one academic paper published in a journal listed in Clause 3.1.

3.4 Having won a state-level sci-tech achievement award (among the first five winners) or a provincial or ministerial-level sci-tech achievement award (among the first three winners) is equivalent to one academic paper published in a journal listed in Clause 3.1.

Article 4 The academic papers published in domestic and foreign journals other than those stipulated in Article 3 should be approved by the degree subcommittee in Public Administration and Humanities.

Article 5 A master's candidate should not make any change to the author's order or signing institution of any academic paper used for degree application before it is

officially published; otherwise USTC will take serious action or revoke the degree awarded.

Article 6 The regulations shall be implemented from June 2022.

Criteria for Award of Postgraduate Degrees in History of Science and Technology

Article 1 The Criteria for Award of Postgraduate Degrees in History of Science and Technology is hereby formulated by the degree subcommittee of Public Administration and Humanities after discussion and research according to *the Implementing Regulations of USTC for Award of Master's and Doctoral Degrees, the General Provisions of USTC for Postgraduate Programs (2019)*, and the spirit of the relevant instructions of USTC on the training of postgraduates.

Article 2 Requirements for Study and Training Process of Postgraduates in History of Science and Technology

2.1 The Admission Qualifications of Master Candidate

The admission qualifications of master candidate should be governed by the relevant unified regulations of USTC.

2.2 The Admission Qualifications of Doctoral Candidate

Transferring of master candidates into the doctoral program: all applicants should take the doctoral qualifying examination organized by the department, and the degree subcommittee should select the best candidates by making comprehensive reference to the academic level and examination results of the applicants and considering their study and academic research.

The admission qualifications and assessment of doctoral candidates should be governed by the relevant unified regulations of USTC.

2.3 Requirement for Courses and Credits

During the program, a postgraduate must meet the requirements for courses and credits detailed in *the USTC Education Program in History of Science and Technology*.

2.4 Requirements for Academic Exchange

1. International academic exchange: A doctoral candidate must attend at least one high-level international academic conference and deliver an academic lecture at the conference in the program duration, or participate in cooperative research or joint training in an overseas educational or research institution for at least four weeks. After completing the international academic exchange, the candidate must submit the relevant supporting documents to the Teaching Management Office of the department.
2. Domestic academic exchange: A postgraduate is encouraged to attend domestic high-level academic conferences and deliver academic lectures.

The department should hold regular academic activities for postgraduates. A master candidate must deliver at least one public academic lecture in the school or department in the program duration, and a doctoral candidate must deliver at least two academic lectures related to the dissertation in seminars after making substantive progress on the dissertation.

All postgraduates should actively participate in the academic lectures organized by the department, and must compulsorily attend at least 80% of the total academic lectures of the year in the first year of their study.

2.5 Evaluation of Dissertation prospectus

The dissertation prospectus for a master candidate's thesis should be completed in the third semester of the program generally, and evaluated by a group consisting of at least three experts with an associate professor title or above (excluding the Supervisor).

The dissertation prospectus for a doctoral candidate's dissertation should be scheduled by the Supervisor according to the research progress of the doctoral candidate. Generally, it should be completed in the third semester of the program and the fourth semester at the latest. The doctoral student who fails to complete dissertation prospectus on time should have his program duration extended and the relevant details are provided by the Graduate School of USTC. The dissertation prospectus must be open to all the faculty and students of the department and evaluated by a group consisting of at least five experts with an associate professor title or above (excluding

the Supervisor and including at least three professors) of the discipline or the related discipline organized by the degree program.

The group should evaluate the dissertation prospectus and determine whether it is acceptable. The dissertation prospectus failed to be approved by the evaluation group must be revised and reevaluated later properly. If the dissertation topic has been significantly different from that of dissertation prospectus's, a new dissertation prospectus must be reevaluated. It usually takes at least one year from the completion of dissertation prospectus to official graduation.

2.6 Review of Thesis or Dissertation

A master candidate's thesis should be pre-reviewed in accordance with the *Implementing Regulations for Pre-review of Theses and Dissertations for the Department of History of Science and Technology and Scientific Archeology of USTC*.

The thesis or dissertation cannot be formally submitted for review until it has passed the pre-review. You can find more details in the *Implementing Regulations of USTC for Award of Master's and Doctoral Degrees*.

2.7 Thesis Defense

Thesis or dissertation defense should be regulated by the Graduate School of USTC and governed by the *Implementing Regulations of USTC for Award of Master's and Doctoral Degrees*.

2.8 Public Display of Thesis

Please see the relevant regulations of USTC.

2.9 Random Spot-check of Thesis

If a thesis or dissertation which has passed the defense is found to be unqualified in the random spot-check by the relevant authorities, the degree committee of the department should organize a re-review to decide whether to request the USTC Degree Management Committee to revoke the awarded degree.

2.10 Supervisor's Responsibility

Please see Clause 6 of the *General Provisions of USTC for Postgraduate Programs (2019)*.

Article 3 All unspecified matters should be governed by *the Implementing Regulations of USTC for Award of Master's and Doctoral Degrees (Xiaoxueweizi [2017] No. 187)*.

Article 4 Requirements for Academic Achievements of Postgraduates in History of Science and Technology

1. Before applying for a degree, a postgraduate must have academic papers published (or accepted) in foreign or domestic core journals (see the attached list of journals) as the first author and with USTC as the first signing institution. The content of the academic paper should be the body of the thesis or dissertation. A master candidate must have at least one academic paper published (or accepted) while a doctoral candidate must have at least two academic papers published (or accepted).
2. The academic papers mentioned above do not include non-research achievements such as reviews, popular science, translations, book reviews, synopses or news reports, or the collation of original materials such as antiquarian books, archival records and question-and-answer interviews. If the chapters or other parts of an academic work are of similar value to an academic paper, they can be used for master's degree application but not for doctorate degree application. The full text of an academic paper collected in conference proceeding or a paper collection with an IBSN number can be used for master's degree application but not for doctorate degree application.
3. The first author mentioned above means the first person in the author order of an academic paper in a journal, with a maximum of two first authors recognized. If both of the two co-first authors are postgraduates, their contribution to the paper should be counted as 50%, respectively and 1/2 paper can be used for their degree application. If the first author of a paper is the Supervisor of the second author (including the second Supervisor or the Tutor), the second author (postgraduate) will be regarded as the first author for degree application with the Supervisor should not be counted. If the first author of a paper is the Supervisor (including the second Supervisor or the Tutor), and the postgraduate is the third or later author of the paper, the postgraduate cannot be regarded as the first author. Except for those whose corresponding author and first

author are the same person, a paper whose corresponding author is a postgraduate cannot be used for degree application of this postgraduate.

4. A doctoral candidate must publish at least one academic paper as the first author (excluding the co-first author or the Supervisor as the first author) for his/her degree application.

5. A postgraduate should not make any change to the author's order or signing institution of any academic paper used for degree application when it is officially published. Otherwise serious punishments will be taken until the degree is revoked.

6. An academic paper for doctorate degree application should be published in any of the following journals:

(1) the journals (excluding expanded journals) included in CSSCI, CSCD, SCI, SSCI or AHCI core libraries over the last five years;

(2) the journals marked "*" in the list attached of journals herein.

7. An academic paper for master's degree application should be published in any of the following journals:

(1) the journals (including expanded journals) included in CSSCI, CSCD, SCI, SSCI or AHCI core libraries over the last five years;

(2) the journals in the attached list of journals herein.

8. One academic paper published in the journals (excluding expanded journals) included in CSSCI, CSCD, SCI, SSCI or AHCI core libraries should be sufficient for degree application.

9. A high-level academic paper which is officially published but is not included in the above journals should be submitted to the degree subcommittee for discussion on whether it meets the requirements for degree application.

10. Any academic paper that has been used for the application of a master's degree of the field or master's or doctoral degrees of other fields should not be repeatedly used for doctoral degree application of the field.

11. The Criteria should apply to all postgraduates including international students.

Article 5 The criteria shall be implemented from January 2022.

Criteria for Award of Postgraduate Degrees in Archeology

Article 1 The Criteria for Award of Postgraduate Degrees in Archeology is hereby formulated by the degree subcommittee in in Public Administration and Humanities after discussion and research according to the Implementing Regulations of USTC for Award of Master's and Doctoral Degrees, the General Provisions of USTC for Postgraduate Programs (2019) and the spirit of the relevant instructions of USTC on the training of postgraduates.

Article 2 Requirements for Study and Training Process of Postgraduates in Archeology

2.1 Admission Qualifications Master's candidates

The admission qualifications of master's candidates should be governed by the relevant unified regulations of USTC.

2.2 Requirements for Courses and Credits

A postgraduate must meet the requirements for courses and credits in the program duration according to the USTC Education Program in Archeology.

2.3 Requirements for Academic Exchange

A master's candidate is encouraged to attend domestic high-level academic conferences and deliver academic lectures.

The department must hold regular academic activities for postgraduates. A master's candidate must deliver at least one public academic lecture in the school or department in the program duration.

All master's candidates should actively participate in the academic lectures organized by the department, and attend at least 80% of the academic lectures in the first year of the program duration as compulsory part.

2.4 Evaluation of Dissertation prospectus

The dissertation prospectus for master's thesis should be completed in the third semester of the program duration in general, and evaluated by a group consisting of at least three experts with an associate professor title or above and excluding the Supervisor. A dissertation prospectus failed to approve by the evaluation group should be repeated later properly. If a research topic has been significantly changed after dissertation prospectus, a new dissertation prospectus should be made. It should take at least one year from the completion of dissertation prospectus to graduation.

2.5 Review of Degree Thesis

A master's thesis should be pre-reviewed in accordance with the Implementing Regulations for Pre-review of Theses and Dissertations for the Department of History of Science and Technology and Scientific Archeology of USTC.

The master's thesis should be formally submitted for review according to the Implementing Regulations of USTC for Award of Master's and Doctoral Degrees after successful pre-review.

2.6 Thesis Defense

Thesis defense should be governed by the Implementing Regulations of USTC for Award of Master's and Doctoral Degrees.

2.7 Public Announcement of Thesis

Please see the relevant regulations of USTC.

2.8 Random Review of Thesis

If a thesis or dissertation which has passed the defense is found to be unqualified in the random review by the relevant authorities, the degree committee should organize to re-review the thesis or dissertation and decide whether to request the USTC Degree Management Committee to revoke the awarded degree according to the re-review results.

2.9 Supervisor's Responsibility

Please see Clause 6 of the General Provisions of USTC for Postgraduate Programs (2019).

Article 3 All unspecified matters should be governed by the Implementing Regulations of USTC for Award of Master's and Doctoral Degrees (Xiaoxueweizi [2017] No. 187).

Article 4 Requirements for Academic Achievements of Postgraduates in Archeology

1. Before applying for a degree, a master's candidate must have at least one academic paper related to the thesis published or accepted in a foreign or domestic core journal (see the attached list of journals), as the first author and with USTC as the first signing institution, or have published related academic works or part thereof.

2. Academic papers do not include non-academic achievements such as reviews, popular science, translations, book reviews, synopses or news reports, or the collation of original materials such as antiquarian books, archival records and question-and-answer interviews. A master's candidate should have independently contributed at least 30,000 words to the academic works or part thereof used for the degree application as academic achievements.

3. The first author herein means the first person in the author order of an academic paper in a journal, with a maximum of two first authors recognized. If both of the two co-first authors are postgraduates, their contribution to the paper should be counted as 50%, and only 1/2 paper counted for their degree application. If the first author of a paper is the Supervisor of the second author, including the second Supervisor or the Tutor of the second author, the Supervisor, the second Supervisor or the Tutor should not be counted, and the second author regarded as the first author for degree application. If the first author of a paper is the Supervisor, including the second Supervisor or the Tutor, and the postgraduate is the third or after author of the paper, the postgraduate cannot be regarded as the first author. Except for those whose corresponding author and first author are the same person, a paper whose corresponding author is a postgraduate cannot be used for degree application of this postgraduate.

4. An academic paper for master's degree application should be published in any of the following journals:

(1) the journals (including expanded journals) included in CSSCI, CSCD, SCI, SSCI or A&HCI core libraries over the last five years;

(2) the journals in the attached list of journals herein.

5. One academic paper published in any of the journals (excluding expanded journals) of SCI, SSCI or A&HCI core libraries should be counted as two academic papers.

(1) Any academic paper that has been used for the application of a master's degree or other professional or doctoral degrees should not be repeatedly used for degree application.

6. A high-level academic paper published in a journal not included above should be submitted to the degree subcommittee for discussion on whether it meets the requirements for degree application. An academic paper collected in a paper collection or a conference proceeding can be used for master's degree application once approved by the degree subcommittee.

Article 5 The Criteria shall be implemented from January 2022. The implementing regulations should be formulated by the program station accordingly.

Criteria for Award of Postgraduate Degrees in Law

Article 1 The Criteria for Award of Postgraduate Degrees in Law is hereby formulated by the degree subcommittee in Public Administration and Humanities after discussion and research according to the Implementing Regulations of USTC for Award of Master's and Doctoral Degrees (Xiaoxueweizi [2009] No. 173) and the spirit of the relevant instructions of USTC on the training of postgraduates.

Article 2 Requirements for Study and Training Process of Postgraduates in Law

2.1 Course requirements in the field of specialization: A candidate shall complete the course requirements stipulated in the training program before applying for graduation and degree.

2.2 The dissertation prospectus for the master's thesis shall be evaluated and scheduled by the Supervisor according to the research progress of the candidate, and shall generally be completed by the fourth semester of the master's program. The dissertation prospectus shall be organized by the School, and evaluated by a review committee consisting of at least three peer experts of the discipline and related disciplines with a senior professional title, and is approved only if at least two-thirds of the review experts vote in favor. A candidate whose dissertation prospectus failed may apply to repeat the dissertation prospectus after two months.

2.3 The mid-term examination shall be conducted to evaluate the thesis generally one semester after the dissertation prospectus is approved. The department shall assemble an expert committee for mid-term examination. The formation of the review committee and the approval measures shall be similar to that for the dissertation prospectus. The candidate who fails the mid-term examination may apply to resit the mid-term examination within two months, and if having failed again, may not apply for the thesis defense.

2.4 A candidate shall attend the academic lectures organized by the program unit during the program. A candidate is encouraged to participate in the academic

conferences at home and abroad with the relevant academic achievements during the program.

2.5 The quality and preparation requirements for the thesis shall be governed by the USTC Manual for Thesis Preparation.

2.6 The requirements for thesis review and defense shall be governed by the Implementing Regulations of USTC for Award of Master's and Doctoral Degrees.

Article 3 Requirements for Academic Achievements of Master's candidates in Law

3.1 Before applying for a master's degree, a candidate must have at least one academic paper related to his/her thesis published or accepted in a domestic core journal (as shown in the attached list of journals) recognized by the degree subcommittee or a journal included in SSCI (included expanded journals), CSCD (core library) or Peking University's GCJC, or the paper collection sponsored by a university with "Double First-class" construction, as the first author (the Supervisor is not counted) and with USTC as the first signing institution.

3.2 Any of the following academic achievements obtained in the master's program duration is equivalent to one paper published in a domestic core journal:

1. Having an academic paper published or accepted in a peer-reviewed international English language journal;
2. Having an academic paper collected in the proceeding of an international conference (with an ISBN number);
3. Won a state-level scientific research achievement award (ranked among the top five) or a provincial or ministerial-level scientific research achievement award (ranked among the top three).
4. Published an academic monograph (among the first three authors and independently contributed a total of more than 30,000 words).
5. Obtained an invention patent related to the dissertation granted as the first inventor (except for the Supervisor's signature) with the patent certificate issued.
6. Published a provincial or ministerial-level or above special report for internal reference as the first author (except for the Supervisor's signature).

7. Having a law case included in the Law Library of China Professional Degree Case Center or other influential case libraries in China.

3.3 Papers published by a master's candidate in journal supplements should generally not be recognized.

Article 4 The degree subcommittee should discuss and decide on academic papers published in a domestic journal not included in those recognized by the committee and other academic achievements obtained by master's candidates related to the thesis.

Article 5 A master's candidate should not make any change to the author's order or signing institution of any academic paper used for degree application before it is officially published; otherwise USTC will take serious action or revoke the degree awarded.

Article 6 The Criteria shall be implemented from June 2021.

Criteria for Award of Postgraduate Degrees in Marxist Theory

Article 1 The Criteria for Award of Postgraduate Degrees in Marxist Theory is hereby formulated by the degree subcommittee in Public Administration and Humanities after discussion and research according to the Implementing Regulations of USTC for Award of Master's and Doctoral Degrees, the Guidance of USTC on Recognizing

Innovative Achievements for Postgraduate Degree Application, and the spirit of the relevant instructions of USTC on the training of postgraduates.

Article 2 Requirements for Study and Training Process of Master's Candidates in Marxist Theory

2.1 In the program duration, a master's candidate must meet the requirements for courses and credits and other compulsory requirements stipulated in the training program.

2.2 The dissertation prospectus for the master's thesis shall be evaluated and scheduled by the Supervisor according to the research progress of the candidate, and shall generally be completed by the fourth semester of the master's program. The dissertation prospectus should be organized by the First-class discipline of Marxist Theory, and evaluated by a group consisting of at least five experts of the discipline and related disciplines. A dissertation prospectus should be acceptable only if being approved by a two-thirds majority of the evaluation experts. A candidate whose dissertation prospectus failed may apply for repeating the dissertation prospectus in the next semester.

2.3 The mid-term examination shall be conducted to evaluate the thesis generally one semester after the dissertation prospectus is approved. The First-class discipline of Marxist Theory should organize an expert group for mid-term examination the way the dissertation prospectus evaluation group is formed. The candidate who fails the mid-term examination may apply to resit the mid-term examination within two months, and if having failed again, may not apply for the thesis defense.

2.4 A candidate shall attend the academic lectures organized by the program unit during the program. A candidate is encouraged to participate in the academic conferences at home and abroad with the relevant academic achievements during the program.

2.5 The achievements presented in a master's thesis should be advanced and of good academic level in the discipline. The requirements for thesis preparation should be governed by the USTC Manual for Thesis Preparation.

2.6 The requirements for thesis review and defense should be governed by the Implementing Regulations of USTC for Award of Master's and Doctoral Degrees.

Article 3 Requirements for Academic Achievements of Master's Candidates in Marxist Theory

3.1 Before applying for a master's degree, a candidate must have at least one academic paper related to his/her thesis, published or accepted in a journal included in SSCI, A&HCI, CSSCI, CSCD (core library), Peking University's GCJC or other databases, or a domestic journal recognized by the degree subcommittee in Public Administration and Humanities, as the first author and with USTC as the signing institution.

3.2 An academic monograph related to the thesis published by a master's candidate (among the first three authors and with a total of more than 25,000 words independently contributed) is equivalent to one academic paper published in a journal listed in Clause 3.1.

3.3 An academic paper published by a master's candidate as the first author (the Supervisor is not counted) in the journal of a university approved with a graduate school, with USTC as the first signing institution is equivalent to one academic paper published in a journal listed in Clause 3.1.

3.4 Having won a state-level sci-tech achievement award (among the first five winners) or a provincial or ministerial-level sci-tech achievement award (among the first three winners) is equivalent to one academic paper published in a journal listed in Clause 3.1.

Article 4 The academic papers published in domestic and foreign journals other than those stipulated in Article 3 should be approved by the degree subcommittee in Public Administration and Humanities.

Article 5 A master's candidate should not make any change to the author's order or signing institution of any academic paper used for degree application before it is officially published; otherwise USTC will take serious action or revoke the degree awarded.

Article 6 The regulations shall be implemented from June 2022.
